About Company

We take pride to introduce ourselves as reputed software development and digital transformation service company offering end-to-end solutions for SMEs to digital agencies around the globe. Our specialty is developing customized solutions using innovative technologies and resources.

We have a highly skilled and enthusiastic team of over 100+ creative designers, developers, QAs, and marketers who all work under one roof to set new standards for digital experiences.

Vision 01

To be a dominant service provider in the IT sector and help companies improve their business growth and success.

Mission 02

Providing innovative and reliable solutions with the highest quality and unshakable protocols to meet the needs of our customers

Values 03

We are interested learners and experienced pioneers. Jointly, we can develop solutions that serve not only technology but also the people behind it.

Message From The CEO

- Ensuring reliability, honesty, and transparency in dealings.
- Understand and surpass customer anticipation at all times.
- Identify the customers' pain points and resolve their specific problems.
- Many advantages of a healthy lifestyle, including flexible working hours.

99

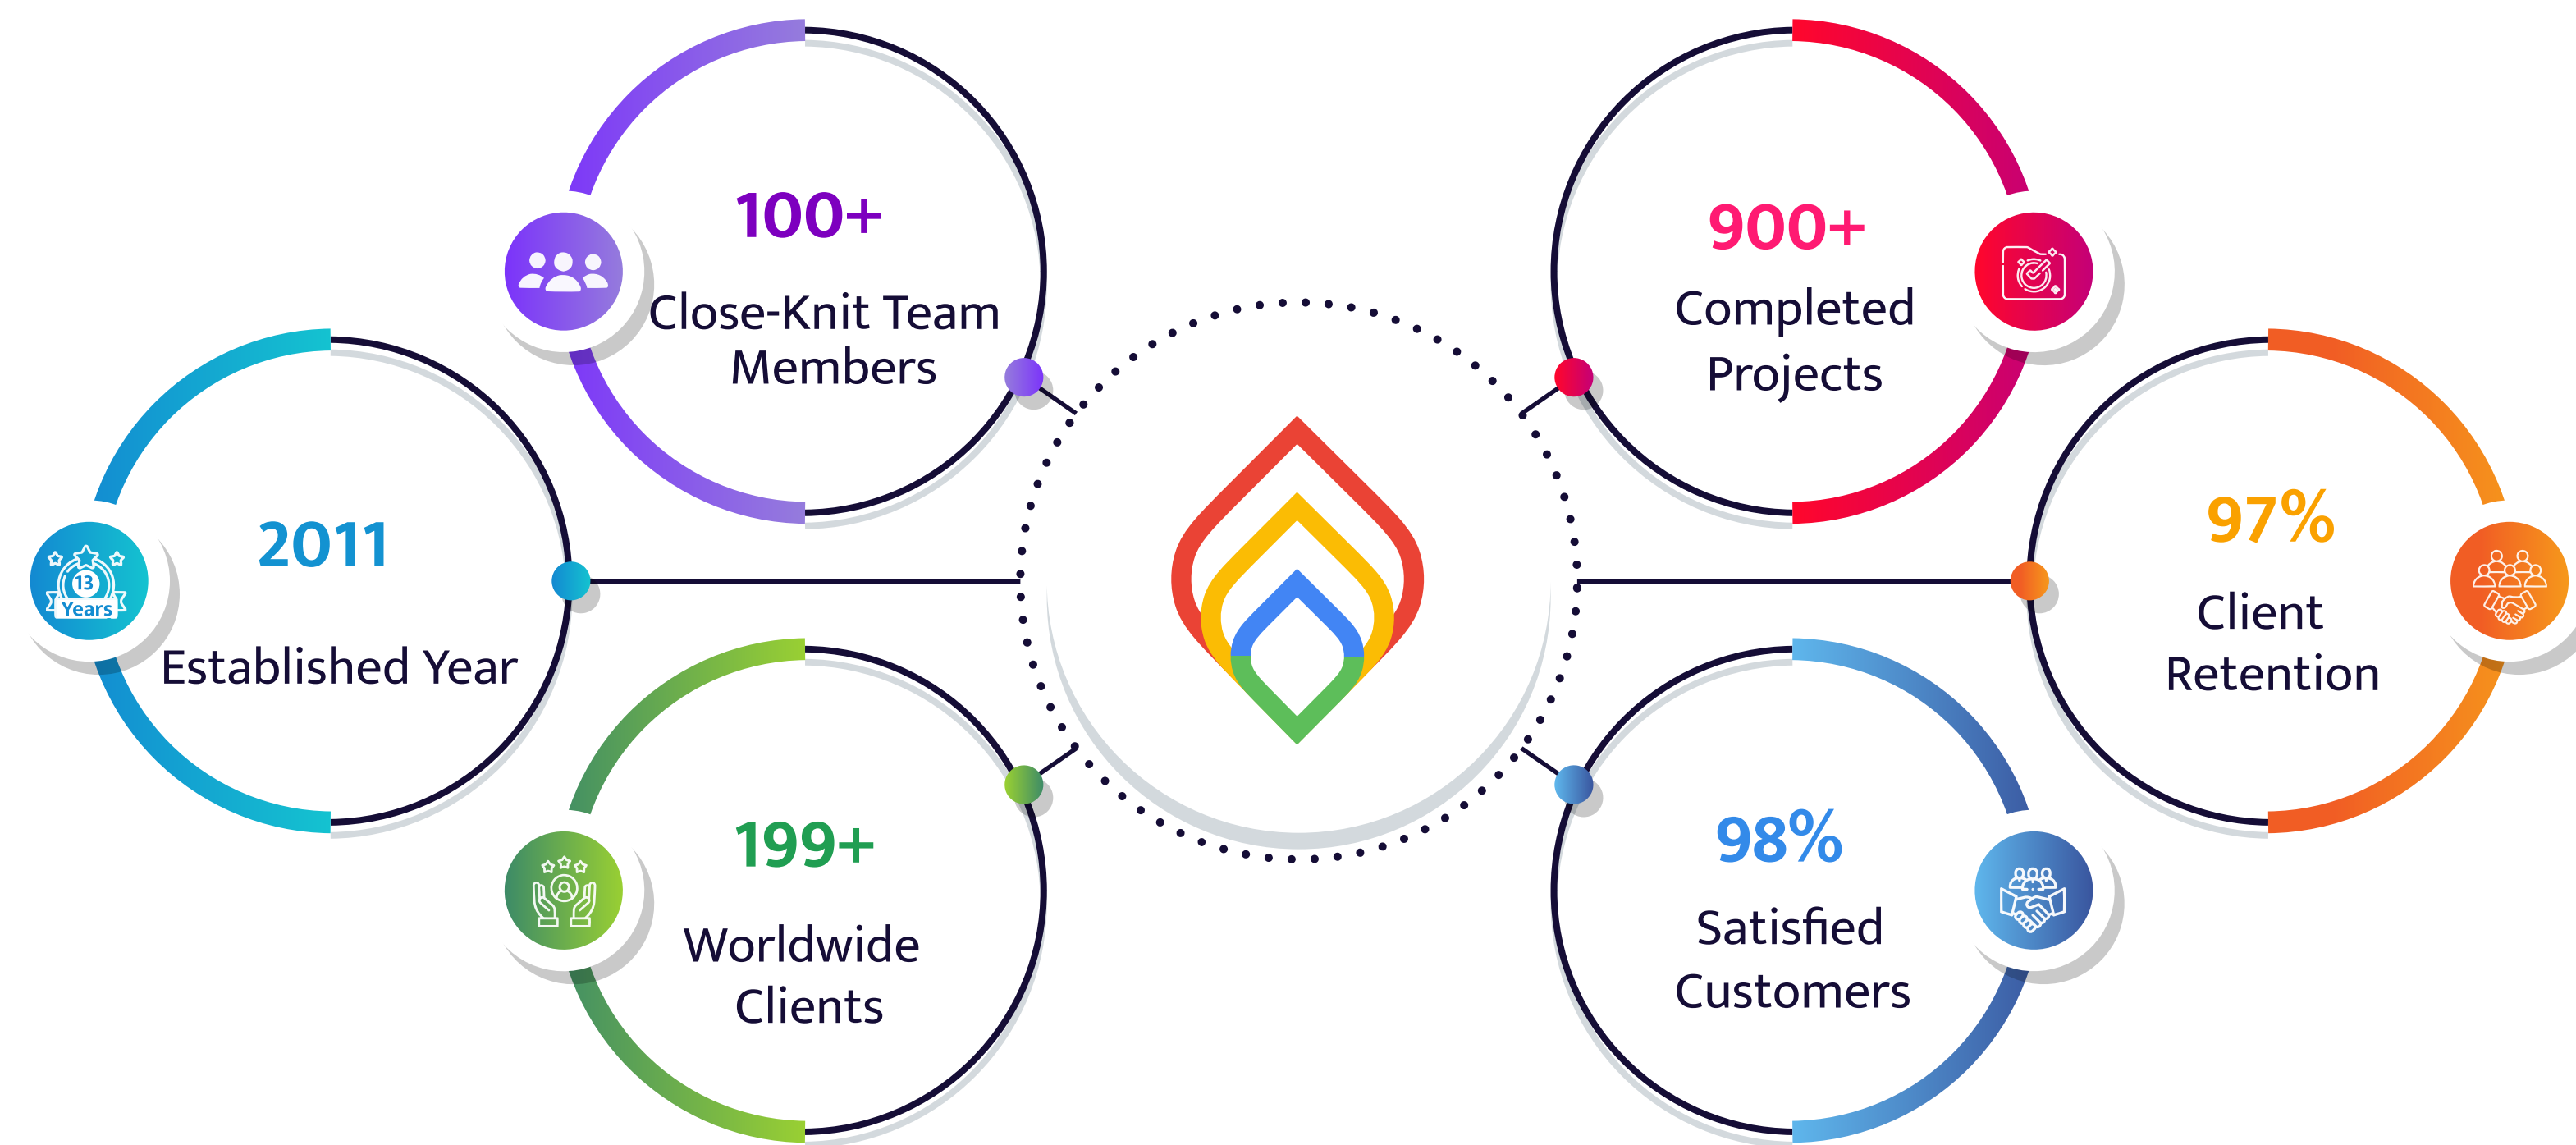

I have been fortunate enough to guide our expert team through the years. Leading Technoduces into several innovative products and providing software development and digital transformation service. I aim to increase our efficiency in the technological sector and create a brand that future industry looks upon.

Mr. Rameshkumar
Chief Executive Officer

Oil & Gas (Energy/Utilities)
ERP, HSE and Energy

Engagement Models

Since we recognize that each project has unique requirements, we offer them a variety of engagement approaches.

Fixed Bid

The fixed price structure is best suited for small or large projects. It is ideal for projects with a narrow scope and precisely specified requirements that are unlikely to alter.

Time and Material

The optimal use of time and resources is for large, intricate, and protracted tasks. It's perfect for projects that need help and maintenance during the testing or bug-fixing stages.

Dedicated Team

A dedicated team approach is the best option if you're seeking long-term collaboration on a complex project that will start from scratch.

How Do We Work?

We provide full-cycle software development services, and best practices in a structured, organized manner. We build the relationship with a thorough examination of the business requirements and continue it with support and maintenance after the launch.

Development Methodologies

Technoduces offers a range of software development methodologies to cater to diverse project requirements:

Agile: With our Agile methodology, we embrace adaptability and collaboration to deliver iterative and incremental software solutions, fostering client involvement throughout the development cycle.

Waterfall: Our systematic approach ensures each development phase is completed before moving to the next, providing a structured and sequential process.

Scrum: Our Scrum framework emphasizes teamwork, transparency, and regular feedback, allowing us to efficiently manage complex projects and deliver high-quality software on time.

Rapid Application Development (RAD): Through RAD, we accelerate the development process by focusing on prototyping, iterative testing, and quick feedback loops, ensuring faster time-to-market for your software solution.

Why Choose Us

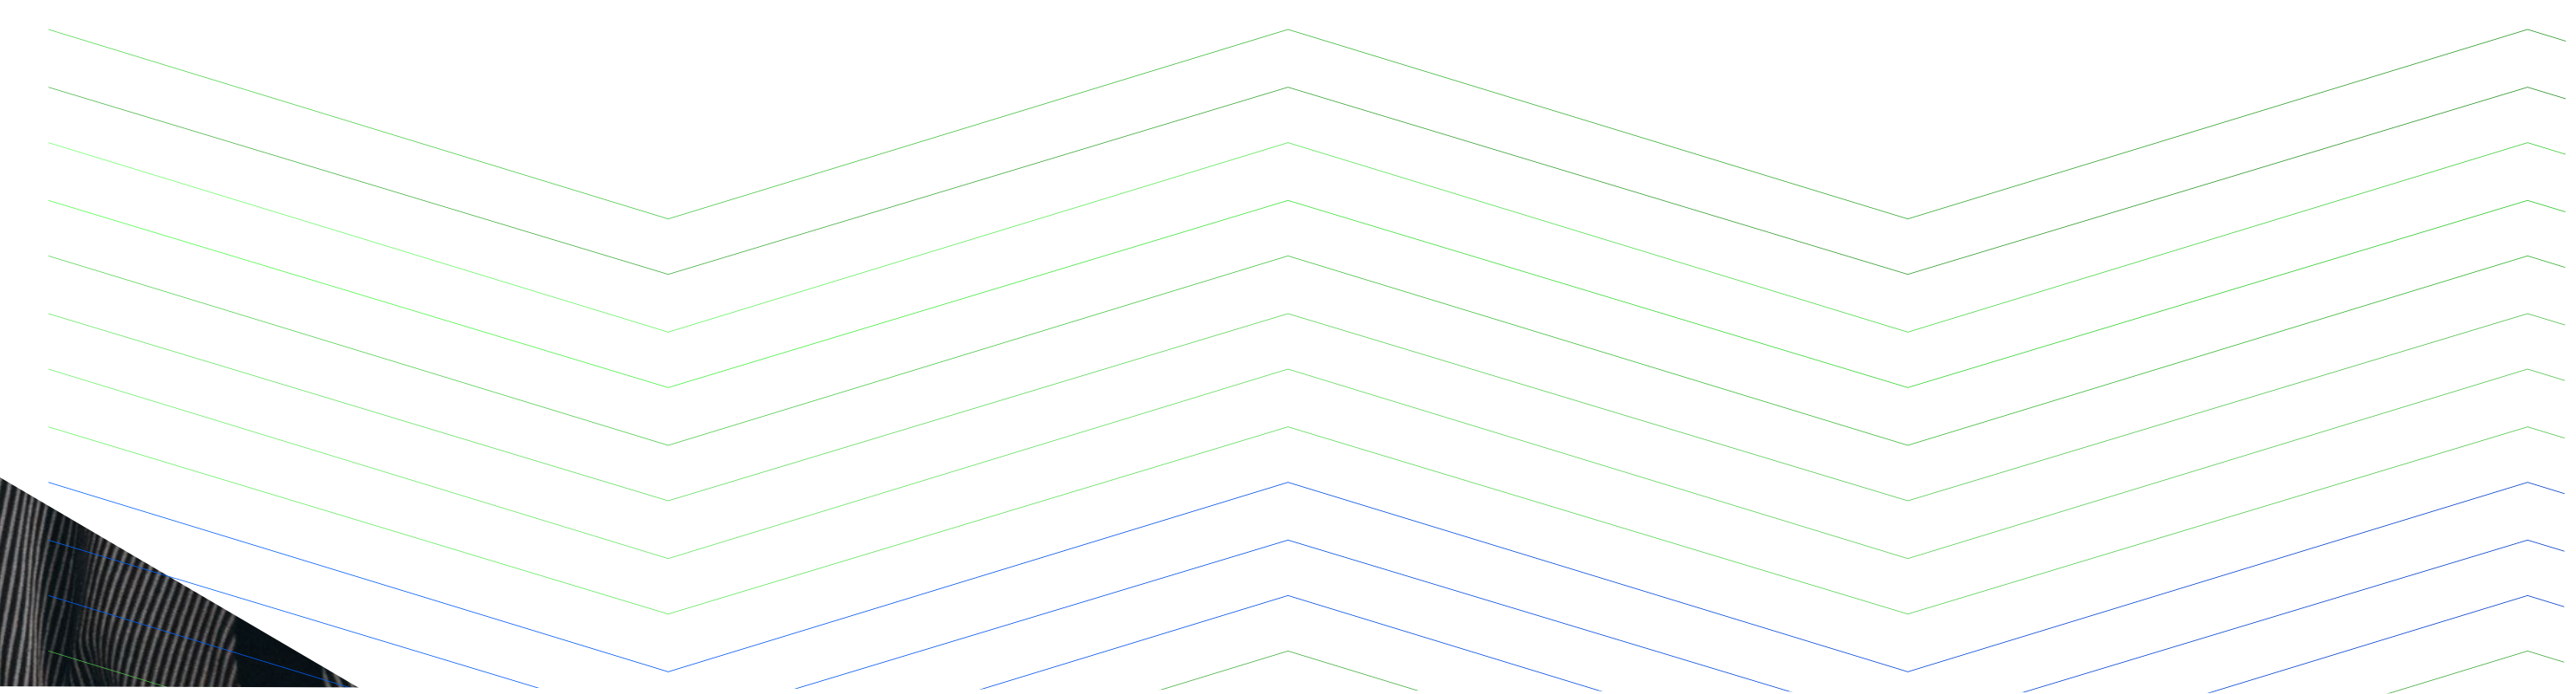

Technoduces provides clients with more transparency and predictability regarding the development process. As a strategic partner, we will consider the perfect technologies for your business, from current technology to future technology.

- ✓ Decade of Experience
- ✓ Proven Development Records

- ✓ Customer-Focused Approach
- ✓ Quick Response and Support

Security and IP

Technoduces pays due diligence to security and intellectual property protection. We value customers' IP rights and data by securing business processes in the best possible manner. We safeguard your software assets and protect your legitimate interests by implementing best practices.

- ✓ Corporate Security Surveillance
- ✓ Biometrics
- ✓ Firewalls
- ✓ Total Ownership
- ✓ 24/7 Security
- ✓ CCTV
- ✓ Information Non-Disclosure

Client Speak About

Most of our clients are startups or SMEs and digital agencies.

We have also worked with many Fortune 500 companies.

Mr. Brendan Healy,
CEO and Founder,
QiQ Enterprises Limited, Ireland.

99

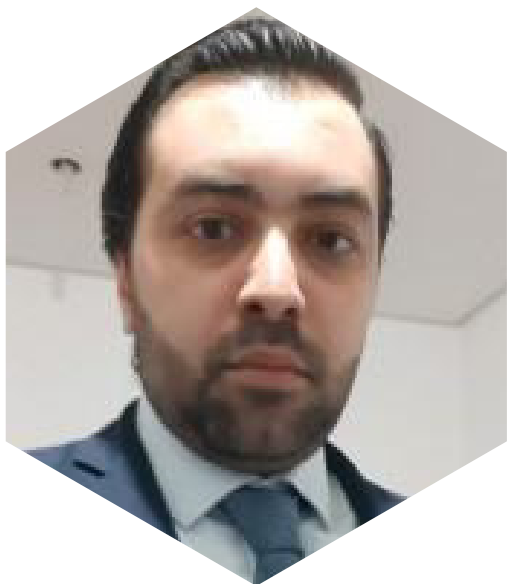

I can't recommend Technoduces Info Solutions highly enough. They go above and beyond. I traveled from Ireland to Technoduces Head office in India. I new one I met Mr. Rajesh Prabhu the CEO that he and his team were trustworthy organization. Technoduces have build us an amazing platform on time and on budget.

Mr. Michel Garrido,
Co-Founder
Cosanuova, Florida, USA.

99

We have worked with Technoduces for a few months on the development of our Cosanuova site. From the beginning, we have had great responses and communication with everyone on the team. Through all the unexpected issues they were very gracious and their support has been outstanding on the personal and technical side. The team has made a great effort to make sure that our application met our high standards. Thanks, Technoduces!

Mr. Mohamed Shaalan,
Technical Manager
Mezzan Holding (Atsawag), Kuwait.

99

Technoduces Info Solutions Pvt Ltd developed web and mobile apps where consumers can purchase groceries and get them delivered. They also automated the processes, which streamlined the supply chain. It became the main shopping platform of the client's buyers during the pandemic. The app was released within three months and had more than 100 orders in its first week. Overall, the client appreciated their support.
